Leslie Lamport's book [Lamport, 1986] is the obvious place to start, but is probably better as the second or third place.

Better places to start are *Essential L<sup>A</sup>T<sub>E</sub>X* [Warbrick, 1994] and *The Not So Short Introduction to L<sup>A</sup>T<sub>E</sub>X<sub>2</sub> $\epsilon$*  [Oetiker & Schlegl, 2008]; *An Introduction to T<sub>E</sub>X and Friends* [Maltby, 1992] is also good.
